

Cafe Napoli – Fresh Milk

The Cafe Napoli Coffee Machine is a compact, innovative solution designed for offices, hotels, and self-service areas. Combining advanced fresh milk technology, energy efficiency, and a modern design, the Cafe Napoli delivers barista-quality beverages with ease, making it ideal for businesses looking to enhance their coffee offerings.

Built for medium-demand environments, the Cafe Napoli is capable of producing up to 150 drinks per day. Its innovative Micro-Injected Air (MIA) technology ensures perfectly textured hot and cold fresh milk foam, elevating beverages like cappuccinos, lattes, and flat whites. With up to 12 programmable drink options, the machine delivers a wide variety of high-quality beverages.
